"I LEVE, VOT LOVE." Old Jones, the village pedagogue, Young Bess, a maid of sweet sixteen, Began the well-known words to say:

"Tirst person, I love," first she said. Sly Tom, beside her, whispered, M. "?" "Second person, you love," Best went on. "Aye, that I do," said Tom,-"love thee.

"Third person, he loves," still said Bess. Tom whispered, "Who is he?" "Oh, Tem," said Bessy, pleading low,

"Do hold your peace and let me be!" "No whispering," called the master loud, And frowned upon the forward youth. "First person, we love," Bessic said. "By George!" Tom whispered, "that's the

CHAPTER I.

"Mother, it seems very hard that we are always to be poor!" and little Latta Green looked up from her knitting to her mother, who was sitting near.

"Hush! my darling child. Let not the demon of discontentment invade our quiet home. Happiness and contentment alone ehould be wooed by the poor and unfortupate. Besides, wealth is but a 'fleeting show of this world. Desire goodness that will last forever; rest your hope on Him who died for sinners, and He will give comfort to our too often rebellious hearts," said Mrs. Green, as she stroked softly and lovingly her daughter's hair.

"Dearest mother, I did not wish to seem rebellious, but a troubled vision visited my elumbers last night, leaving as a token of its visit the wretched feelings that possess me to-day. Let me tell you what it was," and as she spoke she impulsively threw herself on her knees at her mother's side. "I dreamed of leaving home for school, being favored with every advantage and. opportunity of acquiring an education which I was rapidly completing, when another scene presented itself-a coffin! 1 knelt heside it, and, raising the cover, found that its occupant was none other than you, my dearest mother, lying there stif!-cold-dead! Oh! my God! how could I stand it?" and the affectionate daughter, throwing her arms around her mother's neck, wept on her bosom.

"Latta, darling," cried the now distressed mother, "do not give way to such smpty, imaginary troubles. Raise your head, dear. "Twas but a dream," a foolish vision. I have cheering news for my silly little dreamer. "UGLY GREG" AND HIS ROSE.

Detroit Free Press.

At the Detroit House of Correction, a year or so ago, the high white-washed walls of the corridors were furnished with brackets and flower-pots to relieve the monotony and take away the gloom. One It was at a boarding-house where river- would searcely think that the rough-looking, wicked men sent there for robbery, would have passed unnoticed, had not his burglary, arson, and the graver crimes, little babe. After your birth, instead of wild, strange talk aroused some of the men would have eared for the change, but they drawing our hearts more closely, it seemed at midnight. His illness was serions, or gladly welcomed it. A rose, or geranium, and sunshine a little nearer, and to drive "Haul in, all hands there; lively lads, the evil out of their hearts, and it was a strange sight to see hardened criminals watering and nourish eg the tender plants The doctor said it was a bad case. Some | and watching their daily growth.

Two or three mouths before the brackets were hung up a prisoner came from one of the territories-an old, sullen-looking, bad-tempered man, convicted of robbing the mails. They called him "Greg," as short for Gregory, and it wasn't long before they made it "Ugly Greg." He was ugly. He refused to work, eared nothing for rules or regulations, and were spent in the "solitary" for bad behavior. He was expostulated with, will as hard as iron. He hadn't a friend n the prison, and the knowledge of it seemed to make him more ugly and desperate. When the brackets were hing up, there was one to spare, and it was until another spot could be found. No one had any hope that the old man's heart could be softened, and some said that he would dash the flower-pot to the floor.

When he came in from the shops his face expressed surprise at the sight of the little green rosebud so close to the door of his cell. He scented it, earefully placed it back, and it was noticed that the hard lines melted out of his face for a time. No one said anything to him, but the next morning, before he went to work, he carefully watered the rose, and his eyes lost something of their sullen look. Would you believe that the little rosebush proved more powerful than all the arguments and threats of the keepers? It did. strangely enough.

As the days went by the old man lost his obstinacy and his gloominess, and he obeyed orders as well and as cheerfully ns the best man in prison. His face took on a new look, his whole bearing changed, and the keepers looked at him and wonslered if he could be the man Greg of four or five months before. He watched the rose as a mother would watch a child. and it came to be understood that it was his. While some of the other flowers died from the want of eare, the rose-tree grew and thrived and made the old man proud. He earried it into his cell at night and replaced it in the morning, and sometimes he would talk to it, as if it were a human being. Its presence opened his lonely heart and planted good seed there, and from the day the bracket was hung up no keener had the least trouble with Ugly

A few weeks ago he was taken sick, and when he went to the hospital the rose-tree went with him, and was placed where the warm sun could give it all the nourishment it needed. The bud was larger next day, and the rose could be seen bursting through. The flower-put was placed on the bed, near the old man's face, that he might watch the bad blossom into a rose, and he was so quiet that the nurse did not approach him again for hours. The warm spring sun glided in through the bars and kissed the opening bud, and then fell off in showers over the oblinan's pale face, erasing every line

Resolutions. We hold it to be absolutely essential to the preservati in of the liberties of the citizens, that the several States shall be maintained in all their rights, dignity and equality, as the most complete and reliable administration of their own domestic concerns, and the surest bulwarks against anti-republican tendencies. Every attempt on the part of the Federal Government to exercise a power not delegated to it in the Constitution, or to exercise a delegated power in any manner not therein prescribed, is an act of usnepation, demanding the instant and nnaslifed condemnation of a people jealous of their liberties. And we hold that any unconstitutional interference by the General Govern-ment with the local affairs of any State to any extent or under any pretense whatever should be at once condemned by all classes of every cection of the Union, as all cuch acts tend to the destruction of our Federal system and the consolidation of all power in a centralized des-

THE Bowling-Green Democrat is mistaken in its assertion that Col. McCREA-RY, in his speech here, proclaimed his intentiou to vote for the calling of a constitutional convention. He did nothing of the kind. What he did say was this: Having the utmost confidence in the intelligence and wisdom of the people, he had, as a legislator, voted for the bill submitting the question of ealling a convention to the popular vote, but at the same time reserved to himself, as a private citizen, the privilege of voting against the calling of the convention, at the polls, and of voting against the ratification of the instrument it might frame, if he thought it right and proper to do so. Which, the Democrat will see, is quite a different thing from declaring his intention to vote for the calling of a convention.

for garden vegetables, but the field crops about come to the conclusion that this country will do, but there is one thing that I could hardly understand, though I may get used to it yet, and that is: I stayed here nearly all winter and saw no ice, and no cold weather that a Kentnekian would call cold, and yet the people here seem to suffer nearly as much on account of the cool breeze as you do in our severe winter weather. This neighborhood, (Somerset settlement), is made up largely of Kentuckians, and a more noble, intelligent, generous and hospitable community of people I have never met up with. Most of these people came here at an early day, and are called old Texans. And I must confess that it astonishes me no little to see farmers, particularly old Kentucky farmers, manifest so little interest in the culture of stock. It is seldom you find anything here in the horse or cattle line but the commonest stock, with no apparent effort or care to improve it. But I am happy to say that this error is about to be corrected. Some of the farmers are even now discussing the matter, and have determined to club together and send somewhere for improved cattle the coming fall. This will is calculated, with a little care and atention, to lead to magnificent results, for no country promises more natural advantages for the cultivation of stock than this, and in no other country can stockraising be carried on with so small an outlay of capital and labor.

Remember me to the girls and boysespecially the girls. More anon, LYCURGUS HARRISON.

This machine stands in merit far shead of all competitors. In fact there is no machine to be called its competitor. We have improved this machine very much during the past ear, preserving however, the many points of excellence which have made it so deservedly opular in the post. We have replaced the Double Wooden Frame by a single one, and stituting for the Auxiliary Frame an iron drag har, thus making the machine much lighter and handsomer, without lessening its strength end durability, and at the same tima retaining all the advantages of the Double Frame. We have also improved the Raking apparatus, and we have now the best Rake we have ever made, which is equivalent to saying that we have

The Best Breed of Swine.

When I first considered the impor tance of changing my stock of hogs, the questien presented itself, what I should select, as breeders all claimed their stock was the best. So I concluded to commence on the Magpie-large coarse, white hogs, with a few spots on their bodies. But after a careful trial, I was convinced that this was not the hog that would suit me, so I crossed them with the Poland China or Butler county log. This added some good qualities to the Magpie stock but did he stiff, swab the legs and feet with not improve in any respect the Poland hot water—so hot that the hand ean Chiua. The pigs were strong and bear to touch it, but not so hot as to grew rapidly, but did not fatten even. Some that were bred in the Poland China blood were fat and ready for market at ten or twelve months old. and the rest of the lot had to be kept until nearly eighteen months old. So with this result I thought it best to contime my experiments, so I selected some of the best Poland China blood, then added to it the improved Berkshire, and soon found that I had gained the point of my experience. It seemed to increase the size of the Birkshire, and still left their superior fattening qualities. So I fed this cross long enough to satisfy me that they are the hog for the farmer who does not pretend to breed pure strains. But I have come to the conclusion-after carefully investigating the different well as to drive off the insect. theories of breeding-that no cross breed is as perfect and evenly as the one strain in its purity, so I have directed my undivided attention to the Berkshire. My breeding stock is imported, and I find my pigs are strong even when young, and remain so till fattened. So in conclusion I will just say the Berkshire is my hog, for I have found from experience that they are the most profitable breeders. - Cor. Am. Swine Journal.

Ashes for Orchards.

The point to which we now call at tention is, that our farmers and fruitgrowers have ignored, or rather have been ignorant of, the importance of wood ashes as a vegetable stimulant. and as the leading constituent of plants. Even coal ashes now thrown away as useless, having been shown, both by experience and analysis, to posses fair share of alkaline value, we will relate only one experiment: Some twenty-five years ago we treated an hollow-pippin apple tree as follows: The hollow; to the heighth of eight feet, was filled and rammed with a compost of wood ashes, garden mold and a little waste lime (carbonate). The filling was securely fastened in by boards. The next year the erop of sound fruit was sixteen bushels from an old shell of a tree that had borne nothing of any account for some time, and for seventeen years after filling, the old pippin tree continued to flourish and bear well. - Scientific American.

Preparation of Whitewash.

Whitewash is one of the most valuable artirles in the world, when proper ly applied. It prevents not only the decay of wood, but conduces greatly to the healthiness of all buildings, whether wood or stone. Out-buildings and tences, when not painted, should be supplied once or twice a year with a good coat of whitewash, which should be prepared in the following way: Take a clean, water-tight barrel, or other young broods to inclement weather is snitable cask, and put into it half a bushel of lime. The Price of Hogs.

An intelligent writer maintains that the price of hogs this summer must remain at a high figure. He presents the following facts:

The reports from all parts, from Norember 1, 1874, to March 20, 1875, pounds, while from New York, from January 1st, to March 20th, 1875, the exports are about 6,009,000 pounds greater than last. Taking this exhibit of the hag erop, and it is obvious that the summer prices will rule high, it will be profitable for the farmers to quality of stock, as the prices will be maintained, and probably be higher for meats and much higher for lard.

Founder Remedy. . A correspondent of the Agriculturist says: As soon as the horse is found to scald. After a short time the legs should be rubbed dry, and the horse gently exercised. Have never known this remedy to fail.

A correspondent of the Rural Sun says: Founder in its worst form can be his back. Running water is best.

The Tobacco Fly.

The following treatment of tobacco plant beds comes highly recommended from Virginia: Saturate a handful of rags in egal oil and place them in the bottom of the bucket to be filled with land plaster. This is soon saturated with the odor of oil which is scattered over the tobaceo plants infested by the fly. The plaster acts as n fertilizer as

A very good board fence can be made by setting the posts say eleven and one-half feet apart, and spiking on battens, leaving twice the thickness of the boards to be used between the batteus and the posts. As many spikes must be used as the number of posts in the fence, driving them through the battens into the posts where it is intended that the lower edges of the boards are to come. Then twelve-feet boards can be slipped in like bars, lapping the ends by those of the next pannel, and the fence will be found as substantial is if the boards were nailed to the posts, and more convenient, as every pannel s a set of bars. This fence is not so short roll. easily injured by frosts as the ordinary poard fence, there being no nails to mold with sponge cake, cut to fit exbreak when the posts are moved by actly; brush over the inside very lightfreezing and thawing .- Cor. represontation of the productions of our great artists has always been recegnized, and many attempts have been made to meet the want. The successive failures which have so invariably followed each attempt in this country to establish an art journal, did not prove the indiffecence of the people of America to the claims of high art. So soon as a proper appreciation of the want and an ability te meet it were shown, the public at once rallied with enthusiasm to its support, and the result was a great artistic and commercial trimmph—THE ALDINE.

The Aldine while issued with all of the regularity, has none of the temporary or timely interests characteristic of ordinary periodicals. It is an elegant miscettany of pure, light, and graceful literature, and a collection of pietnres, the rarest collection of artistic skill, in black and white. Although each succeeding number affords a fresh pleasure to its friends, the real value and heauty of The Aldine will be most appreciated after it is bennd up at the close of the year. White other publications may claim superior cheapness, as compared with rivals of a similar class, The Aldine is a unique and eriginal conception—alons and nnapproached—absolutely without competition in price or character. The possessor of a complete volume cannot duplicats the quantity of fine paper and engravings in any other shape or number of volumes, for ten time ite cost; and then, there is the chromo, besides?

The autional feature of The Aldine must be taken in no narrow sense. True art is cosmopolitan. While The Aldine is a strictly Ameri-

taken in no narrow sense. True arl is cosmo-politan. While The Aldine is a strictly Ameriran institution, it does not confine itself to the peproduction of nativa art. Its mission is to enlivate a broad and appreciative art taste, one that will disoriminate on grounds of intrinsio merit. Thus, while pleading before the patrons of The Aldine, as a leading characteristic, the productions of the most noted American artists, attention will always be given to specimens from foreign masters, giving subscribers all the pleasure and instruction obtainable from home

pleasure and instruction obtainable from home or foreign sources.

The artistic illustration of American scenery, original with The Aldine is an important feature, and its magnificent plates are of a size more appropriate to the salisfactory treatment of details than can be afforded by any inferior page. The judicious interspersion of landscape, marine, figure and animal subjects, sustain an anabated interest, impossible where the scene marine, figure and animal subjects, sustain an annabated interest, impossible where the scope of the work confines the artist too closely to a single style of subject. The literature of The Aldine is a light and graceful accomeaniment, worthy of the artistic features, with only such technical disquisitions as do not interfere with the popular interest of the work.
